DETAILED ACTION***Sequence Compliance***

The specification contains sequence disclosures (e.g. Figure 2) that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2) but are not present in the Sequence Listing and/or identified in the specification by sequence identifier numbers. Applicant must provide sequence identifiers, in the case that these sequences are not included in the original sequence submission, a paper copy and a computer readable copy of the Sequence Listing and a statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 CFR 1.821(e) or 1.821(f) or 1.821(g) or 1.825(b) or 1.825(d). A full response to this Office Action must include a complete response to the requirement for a Sequence Listing.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S. C. 121:
 - I. Claims 31 and 116 are drawn to a human EOPA gene or cDNA. Classified in class 536, subclass 23.1.
 - II. Claim 62 is directed to a recombinant protein. Classified in class 530, subclass 350.
 - III. Claim 114 is drawn to a method of diagnosis by assessing the level of EOPA mRNA expression. Classified in class 435 subclass 91.2.

Art Unit: 1633

- IV. Claim 114 is drawn to a method of diagnosis by assessing the level of EOPA protein expression. Classified in class 435, subclass 7.1.
 - V. Claim 115 is drawn to a method for compound screening by assaying the compound for an activity as an inhibitor of neuropeptide inactivation by EOPA. Classification is to be determined depending on the nature of the assay.
 - VI. Claim 115 is drawn to a method for compound screening by assaying the compound for an activity as an inhibitor of neuropeptide biotransformation by EOPA. Classification is to be determined depending on the nature of the assay.
2. The inventions are distinct, each from the other because of the following reasons.
- Inventions II-VI and I are directed to related inventions. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, groups II and I are directed to structural distinct compounds that belong to different chemical categories. Groups III-VI are directed to different methods of diagnosis and screening. The different methods have different method steps and mode of operation, use different criteria for assessment, and would require different search field, and technical considerations.
- The differences of the Inventions I-VI are further underscored by their divergent classification and independent search criteria.

Art Unit: 1633

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different search criteria, it would impose an undue burden to the Office if all the groups are examined together, thus, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143), and a listing of all claims readable thereon, including any claims subsequently added.

Applicant is advised that where a single claim encompasses more than one invention as defined above, upon election of an invention for examination, said claim will only be examined to the extent that it reads upon the elected invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
